Procedure for installing the El Prado Seniors web site on I-Pads and I-Phones

The following procedure will place an "El Prado Seniors" web site App on an I-Phone or an I-Pad.

(I think it will also work for any web site and on other smart phones or tablets.)

You should be able to open all of the pages on your device that are not marked "For PC Users only".

- 1 Open Safari
- 2 At the top of the page type in
theelpradoseniorgolfassociation.com (No Spaces)
- 3 Then press "GO"
- 4 The home page should be displayed
- 5 At the bottom of the page , Press the box with the arrow 
- 6 Near the bottom of the new page, Press the box with the plus (+) sign 
- 7 The new app should be on your device

(Continue for other Smart Phones)

The following procedure will place an "El Prado Seniors" web site App on a Samsung smart phone. (Complements of Bob Rose)

1. Open the El Prado Seniors website on your phone. This can be done by using Google Search, type in El Prado Seniors, and open the site that says
"www.theelpradoseniorgolfassociation.com"
2. When you have the site open, you should see three vertical dots on the upper right corner of your phone. Hit the three dots and you will get a box containing several options.
Select "Add to Home Screen".
3. That's it. You should now have an icon on your Home screen that says El Prado Seniors.
